In brief

- 03** 40+ years as *Specialists*.
- 04** A special combination of manufacturing know-how...
...and high-level distribution.
- 05** *Specialists "why"*
- 06** *Specialists "how"*
- 07** *Specialists "for"*
- 08** Why we can be the right partner for you.

40+ years as Specialists.

Complete solutions in hydraulics and for automation, pneumatics and the process industry.

Since 1984, Fluid System has been recognised for its outstanding **expertise** and strong manufacturing capability in hydraulic systems and hydraulic cylinders; for the distribution of high-quality products; for **high-level technical support** at every stage; and for solutions that enhance the technological profile of its customers, ensuring improved production performance and energy savings.

- > **recognised expertise**
- > **strong manufacturing capability**
- > **high-level technical support**
- > **high quality**

A special combination of manufacturing know-how...

HYDRAULIC SYSTEMS AND CYLINDERS

Fluid System designs and manufactures hydraulic and electro-hydraulic systems for plants and machines used across multiple sectors. Every production stage takes place within its own facility: excellent know-how combined with in-depth knowledge of materials and the ability to design and build **custom** hydraulic power units and cylinders.

- > design
- > manufacturing

...and high-level distribution.

COMPONENTS FOR INDUSTRIAL AUTOMATION, PNEUMATICS, HYDRAULICS AND PROCESS INDUSTRY.

As a distributor, Fluid System is also a point of reference in Italy for the **most representative** component **brands**, with a well-stocked warehouse that makes **fast deliveries** possible.

- > selection of the best brands
- > wide product range

Specialists

“why”

For us, standard does not exist.

Specialists because, at Fluid System, day-to-day work means designing and manufacturing **bespoke** products — “special” products, precisely — customised according to the customer’s exact requirements and industrial context.

We apply this same approach to the distribution of components as well: they are proposed exclusively with the aim of providing **real solutions to specific problems**.

- › **used to thinking in terms of dedicated solutions**
- › **processes optimised according to lean management principles**

45 experts.

Across the 3,300 m² headquarters in Villorba (Treviso), 45 highly qualified people in their respective fields work in synergy and in close collaboration with the customer.

The technical department is able to provide an **uncommon level of technical support**. The production department has long-standing experience and is constantly updated in technologies and design techniques, which it applies with a **problem-solving** approach. The warehouse team ensures efficient logistics.

- › **synergy of specific expertise**
- › **technical and technological updating**

Integration

Specialists “how”

**Perfectly integrated into the supply chain,
in line with rising standards.**

We are located right at the centre of a manufacturing environment that, in recent years, thanks to a general rise in the standards required by the international market, has grown exponentially in terms of technological innovation and, above all, entrepreneurial, design and manufacturing culture.

Within this supply chain, and in a context of increasing competitiveness, Fluid System has successfully combined its innate vocation for support and flexibility with the need to *keep pace with the times*.

FLUID SYSTEM

Flexibility

Value

Specialists "for"

- Enhancing the technological profile of our customers.
- Achieving better performance.
- Ensuring greater **efficiency** and energy savings.

Ensuring

- › Quality.
- › Reliability.
- › Collaboration.
- › Trust.

In tune with

Customer requirements.

Cultural change.

The evolution of the **industrial system** and the **market**.

FLUID SYSTEM

Specialists since 1984.

Why we can be the right *partner* for you.

Because experience, expertise, professional reliability and corporate solidity make Fluid System a **trusted and sought-after partner** within the industrial supply chain.

Culturally in tune with the continuous change and evolution of the local and international manufacturing system, we are **innovation enablers** for our customers.

Specialists since 1984.
